

The logo for Aseel Turnike is centered on a white background. The word "Aseel" is written in a bold, sans-serif font, with the letter "A" in orange and "seel" in dark teal. Below it, the word "Turnike" is written in a smaller, orange, sans-serif font. To the right of the text is a vertical, stylized graphic element consisting of a dark teal bar with a grey-to-teal gradient. The background features abstract geometric shapes in shades of orange, teal, and grey, creating a modern and dynamic feel.

WHO WE ARE...

► Asel Turnike is a

brand.

D&C Mekanik was established with 20 years of engineering and manufacturing experience, with the aim of developing quality and cost-effective products that are more durable and keep up with the world standards we live in, by following the constantly developing technology with 100% domestic design and manufacturing capabilities.

OUR PRODUCTS & SERVICES

- ▶ TURNSTILE PASSAGE SYSTEMS
- ▶ HYGIENE STATIONS
- ▶ SOFTWARE SOLUTIONS
- ▶ TECHNICAL SERVICE & MAINTENANCE, REPAIR SERVICES

TURNSTILE PASSAGE SYSTEMS

- ▶ Turnstiles are electronic devices that are designed and manufactured to be suitable for indoor and outdoor environments, perform access control, and track members, personnel, entry and exit (can work integrated with Personnel Tracking Systems). Our turnstile models in all our turnstile passage systems are designed to act as deterrence.
- ▶ Public Institutions, schools, subway stations, ferry piers, companies, plazas, factories, food production areas, areas requiring hygiene, gyms, housing projects, etc. In short, it is produced to serve wherever controlled passage is possible..

TURNSTILE PASSAGE SYSTEMS

- ▶ TRIPOD TURNSTILES
- ▶ VIP TURNSTILES
- ▶ LENGTH TURNSTILES
- ▶ HYGIENE STATIONS
- ▶ OTHER (ACCESSORIES, etc.)

ASEL TURNSTILES SPRECIFICATIONS

- ▶ In all of our turnstiles, arm and hub sections are produced with AISI304 quality stainless steel material as standard.
- ▶ Bidirectional solenoids are used in all our internal mechanisms. There is no need to use springs in solenoids. It was preferred to prevent spring deformation problems. This provides an advantage to our customer in two ways:
 1. Eliminates the problems of inability to enter by showing a card
 2. It eliminates the problems of entering without showing a card.

ASEL TURNSTILES SPECIFICATIONS

- ▶ All our machines have a 5-row trigger feature on their motherboards as standard.

- ▶ Example: Covid era practices can be shown.
 1. HES code control system
 2. Body temperature measurement
 3. Card scanning
 4. Disinfectant spraying
 5. Entrance

ASEL TURNSTILES SPECIFICATIONS

- ▶ Coin recognizers can be connected to the motherboards of all our machines without using any additional relays.
- ▶ (In turnstile market, in order to install a money recognizer, an additional relay system must be connected to the machines, otherwise it causes motherboard system malfunctions. This creates extra costs for our customers. Our ASEL TURNSTILE system has been specially developed to prevent this situation.

SOFTWARE SOLUTIONS

Each turnstile used in our Turnstile Access Systems can work with systems such as card reader, token, money, digital money reader, facial recognition, fingerprint reader and remote control that will be provided by us. Thus, equipment is used in transition systems according to the customer's needs.

With a card reader system and a local or cloud-based personnel tracking system whose software is our own; Staff tracking, member tracking, site resident login tracking can also be easily done. With cloud-based software, you can log in from anywhere with your username and password, providing the opportunity to easily perform all follow-ups from anywhere.

THE ADVANTAGES OF CLOUD SYSTEM

- ▶ Ability to access reports from anywhere with an internet connection
- ▶ Suitable for a variety of channels such as phone, TV, PC etc.
- ▶ There is no need to install a computer connected to the machine!
- ▶ In addition to 6 months of user archiving, there is unlimited backup archive in our cloud system.
- ▶ Free remote connection and problem solving capability in case of technical support needs related to the software on the devices

SOFTWARE SOLUTIONS

- SITE SECURITY TRACKING SYSTEM
- PERSONNEL TRACKING SYSTEM
- CAFETERIA TRACKING SYSTEM
- GYM TRACKING SYSTEM
- SCHOOL/STUDENT TRACKING SYSTEM

HYGIENE STATIONS

- ▶ Hygiene stations are used for hand soaping and washing, hand disinfection and for footwear cleaning and disinfection.
- ▶ Hand hygiene stations are used in different industries to assure a clean and safe environment for the employees and others involved.
- ▶ Hand hygiene statistics show that there is still poor hygiene among many workers, furthermore the hand hygiene statistics indicate that many diseases could be avoided if people followed the proper standards and used hygiene stations.

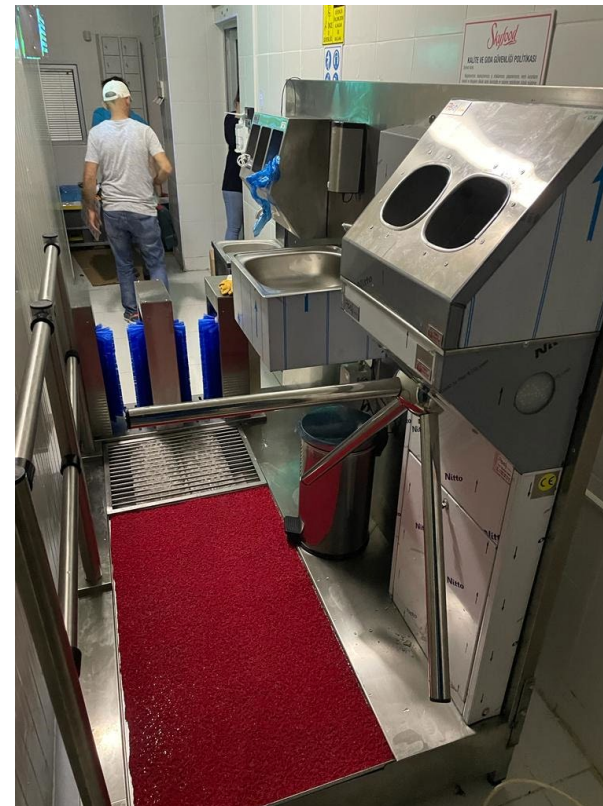

HYGIENE STATIONS

- ▶ Where we really can't overlook the importance of perfect hygiene: production of food, in hospitals, pharmaceutical industry, chemical industry, in public toilets etc.
- ▶ Improper hand disinfection can lead to several serious illnesses, like salmonella, E. coli and norovirus, which can cause diarrhoea and some respiratory infections.
- ▶ A hygiene station stand ensures that all the germs are removed and can't be transmitted from person to person.

HYGIENE STATIONS

Our Hygiene Turnstiles and Stations, which comply with the FOOD Regulation, are produced to standards in accordance with the regulations for all production sectors.
